

CPSC 305 Final Project Information

CPSC 305 Final Project Presentation Requirements

These requirements must be satisfied. The introduction must be first and the summary must be last. The other requirements can be crafted in any order that fits your style of presentation.

- Each team member must be part of the presentation.
- Your presentation shall have an introduction.
- Your presentation shall discuss why you selected your project.
- If you are a team, your presentation shall describe how you divided the work.
- Your presentation shall include a diagram that captures the primary components of your project showing the inputs and outputs. The components shall consist of hardware and software. If your project is a C program running on your laptop, you still have hardware - your laptop, keyboard, and display - for example.
- Your presentation shall use your hardware and software to demonstrate your project.
- Your presentation shall explain the process you followed to complete your project.
- Your presentation shall explain underlying technology.
- Your presentation shall explain obstacles encountered.
- Your presentation shall discuss the fun level of your project.
- Your presentation shall have a summary

Scoring

Students often score a 100 on their final project; however, a 100 is not guaranteed. Sometimes students do not put enough effort into their project, do not complete their project, and are creating their presentation on the fly. Your effort on the project should be similar to your efforts on our other projects. The following are guidelines for scoring.

- 100 - Project completed successfully, project demonstrates **sufficient effort** to complete, project presentation is well organized.
- 85 - Project completed successfully, project demonstrates **effort** to complete, project presentation appears to be a last minute effort.
- 70 - Project completed successfully, project demonstrates **minimal effort** to complete, project presentation appears to be a last minute effort.
- Other scores - determined by project effort, completeness, and presentation. For example, a great project with a bad presentation will not score 100.
- **Deductions** - 15 point deduction for not paying attention to the presentations and completing an evaluation for each presentation. If your laptop is open or your phone is visible, there will be a 15 point deduction.
- **Print the last two pages of this handout and bring with you to the final project presentation day(s).**

Final Two Days of Class

- Tuesday, 11/19: Go over Test 2, Begin Final Project Presentations
- Thursday, 12/1: Finish Final Project Presentations. Everyone agreed to remain until all had a chance to present their project.

Section 1 Presentation Order - meets from 8 to 9:50

Tuesday 11/29 Presentation Order

1. Gus
2. Riley

Thursday, 12/1 Presentation Order

1. Parker
2. Grace, Hajar
3. Eric
4. Imaad
5. Tracy, Max
6. Robert
7. Alex
8. Jeremiah
9. Noah
10. Artis
11. Radoslav

Section 2 Presentation Order - meets from 2 to 3:50

Tuesday 11/29 Presentation Order

1. Ben F
2. Makayla, Nick
3. Thomas

Thursday, 12/1 Presentation Order

1. Shane, Nico
2. Aelliana
3. Ethan
4. Ryan, Joon
5. Bryan, Nahom
6. Adam
7. Zachary
8. Josh
9. Owen, Diana, Ben S.
10. Paul
11. Richard
12. Jayden, Matt

Final Project – Student Evaluation Sheets

Name: _____

Person/Team: Project Name:

Describe one thing about this project that was impressive.

Describe one suggestion for improvement (either project or presentation).

Person/Team: Project Name:

Describe one thing about this project that was impressive.

Describe one suggestion for improvement (either project or presentation).

Person/Team: Project Name:

Describe one thing about this project that was impressive.

Describe one suggestion for improvement (either project or presentation).

Person/Team: Project Name:

Describe one thing about this project that was impressive.

Describe one suggestion for improvement (either project or presentation).
